Professional Summary

Full Stack Developer and Data Science undergraduate with hands-on experience building AI-powered applications, desktop software, and scalable web platforms using React, TypeScript, Node.js, Python, PostgreSQL, and modern software engineering practices. Government of India Design Patent holder with experience delivering production-ready projects spanning Artificial Intelligence, Healthcare, Computer Vision, Networking, and Developer Productivity.

Experience

AI Web Development Intern

2025

InAmigos Foundation (Remote)

- Developed responsive web applications using React.js, HTML, CSS and JavaScript.
- Built REST APIs using Node.js and PostgreSQL.
- Integrated AI-powered features using Python and Machine Learning.
- Improved NGO platforms by developing volunteer management systems, donation modules and responsive interfaces.
- Collaborated using Git, GitHub, Docker and Agile development workflows.

Design Patent

Government of India Design Patent

2025

Patent No. 470097-001

IoT Connectivity Device

- *Received a Government of India Design Patent for an innovative IoT connectivity device designed to improve communication reliability between smart devices.*
- *Designed a scalable communication framework for efficient device connectivity and data transmission.*
- *Demonstrated innovation by integrating hardware concepts with software-driven optimization for IoT ecosystems.*

[Patent Announcement \(LinkedIn\)](#)

Featured Projects

[DeveloperZip – Intelligent Project Packaging](#)

TypeScript • Desktop Application

- Built an intelligent desktop application that automatically packages software development projects into optimized ZIP archives.
- Implemented smart filtering to exclude cache files, build folders, dependencies, and temporary artifacts.
- Designed configurable packaging workflows that improve developer productivity and simplify project sharing.

[GitHub Repository](#)

[OrganLife – Organ & Blood Donation Platform](#)

PHP • MySQL • JavaScript • HTML • CSS

- Developed a full-stack healthcare platform connecting organ donors, blood donors, hospitals, and recipients.
- Implemented secure donor and recipient management with database-backed workflows.

- Successfully deployed the application online using InfinityFree for public access and demonstration.

[GitHub Repository](#)

DeepFER Live – Real-Time Facial Emotion Recognition

Python • TensorFlow • OpenCV • Deep Learning

- Developed a real-time facial emotion recognition system using a custom CNN trained on the FER-2013 dataset.
- Classified seven human emotions from live webcam streams with optimized deep-learning inference.
- Integrated OpenCV-based video processing for interactive real-time emotion analysis.

[GitHub Repository](#)

VisionSync – AI Attendance Management System

Python • Flask • OpenCV • SQLite

- Developed an AI-powered attendance platform using facial recognition, QR authentication, and GPS geofencing.
- Implemented secure attendance verification through device fingerprinting and session validation.
- Built faculty dashboards with attendance analytics and CSV/ZIP export capabilities.

[GitHub Repository](#)

Smart Campus Network with Automatic Access Control

Python • React • PostgreSQL

- Built an intelligent campus network monitoring platform with automated device access control.
- Developed scalable backend services and interactive dashboards for network monitoring.
- Processed authentication events and device metadata for real-time analytics and visualization.

[GitHub Repository](#)

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Responsive Web Design

Backend: Node.js, Express.js, Flask, REST APIs

Databases: PostgreSQL, MySQL, SQLite

AI / ML: Machine Learning, Deep Learning, TensorFlow, OpenCV, Computer Vision, CNN, Pandas, NumPy, EDA

Developer Tools: Git, GitHub, Docker, Streamlit, Power BI, VS Code

Core CS: Data Structures Algorithms, OOP, DBMS, Computer Networks, Operating Systems, Software Engineering

Education

Woxsen University

2023 – 2027

Bachelor of Technology (B.Tech.) in Data Science

Relevant Coursework: Machine Learning • Deep Learning • Data Structures Algorithms • Database Management Systems • Computer Networks • Cloud Computing • Operating Systems

Certifications

- Java Programming — Duke University (Coursera)
- Object-Oriented Programming — University of Alberta (Coursera)
- Data Structures in Python — Coursera

Achievements

- Government of India Design Patent Holder (Patent No. 470097-001).
- Developed and deployed 20+ software projects spanning Full Stack Development, Artificial Intelligence, Machine Learning, Computer Vision, Healthcare, Networking, and Data Science.
- Built publicly available open-source applications demonstrating scalable software engineering and AI-driven solutions.
- Active GitHub contributor with projects focused on developer productivity, intelligent automation, and modern web technologies.
