

NAVARI YASHWANTH REDDY

Software Engineer | Full Stack Development | Backend Engineering

Hyderabad, Telangana, India | +91-6303236366 | navariyashwanthreddy@gmail.com

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Professional Summary

Software Engineer and Data Science undergraduate with hands-on experience building **full-stack web applications, backend services, REST APIs, database-driven systems, desktop applications, real-time applications, and AI-enabled software**. Proficient in **Python, Java, JavaScript, TypeScript, React.js, Node.js, Express.js, Flask, FastAPI, SQL, PostgreSQL, MySQL, SQLite, Git, GitHub, and Docker**. Experienced across the software development lifecycle including **application development, API integration, database design, debugging, deployment, version control, and Agile development**. Strong foundation in **Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, and Software Engineering**. Built and deployed **20+ projects** across software engineering, full-stack development, backend systems, networking, healthcare, analytics, developer productivity, and intelligent applications.

Experience

Data Science with Gen AI Intern – Innovexis

Jul 2026 – Present

Remote

- Develop software and AI-enabled applications using **Python, Generative AI, Large Language Models, and modern software engineering practices**.
- Build application workflows involving **data processing, API integration, backend services, automation, testing, debugging, and deployment**.
- Develop intelligent software workflows using structured application logic, AI services, and reusable software components.
- Collaborate on development, testing, evaluation, debugging, and integration of software and AI-driven application features.

AI Web Development Intern – InAmigos Foundation

Jun 2026 – Jul 2026

Remote

- Developed responsive web applications using **React.js, JavaScript, HTML5, CSS3, and Python** for production-oriented application workflows.
- Built and integrated **REST APIs using Node.js and PostgreSQL** for structured application data and backend operations.
- Developed volunteer management and donation workflows backed by relational database systems.
- Integrated AI-enabled functionality into web applications and contributed to application feature development and optimization.
- Collaborated using **Git, GitHub, Docker, and Agile** software development practices.

Selected Software Engineering Projects

SupportSphere AI – Enterprise Customer Support Platform

Python | FastAPI | TypeScript | PostgreSQL | WebSockets | Docker

- Designed and developed an enterprise-oriented software platform combining **FastAPI backend services, TypeScript frontend, PostgreSQL persistence, WebSockets, authentication, analytics, and AI-powered workflows**.
- Implemented a modular architecture with a supervisor responsible for routing customer requests across specialized service workflows.
- Developed asynchronous backend services using **FastAPI** and WebSockets to support real-time bidirectional communication and streaming responses.
- Implemented structured persistence using **PostgreSQL, SQLAlchemy, and relational data models** for users, conversations, support requests, analytics, and application state.
- Implemented JWT-based authentication and authorization workflows for protected application resources and user sessions.
- Containerized application services using **Docker and Docker Compose** for reproducible development and deployment environments.

DeveloperZip – Intelligent Project Packaging Tool

TypeScript | Desktop Application | File System | Automation

- Developed a desktop application that automatically analyzes and packages software development projects into optimized ZIP archives.
- Implemented recursive project analysis and configurable filtering to exclude **node_modules, build directories, cache files, logs, temporary files, and other unnecessary artifacts**.
- Designed automated packaging workflows that preserve required source code while reducing manual project preparation effort.
- Implemented configurable packaging rules supporting different project structures and development environments.
- Built the application around developer productivity, source-code organization, project sharing, and deployment preparation.

Smart Campus Network with Automatic Access Control

Python | React | PostgreSQL | Networking | Real-Time Analytics

- Developed an intelligent network monitoring platform for analyzing device activity and automating network access-control workflows.
- Built backend application logic for processing **authentication events, device metadata, and network activity**.
- Designed PostgreSQL-backed data storage for structured network monitoring information and historical activity records.
- Developed React dashboards for monitoring, visualization, reporting, and network administration.
- Applied computer-networking concepts to device authentication, access control, event processing, and monitoring workflows.

OrganLife – Organ & Blood Donation Platform

PHP | MySQL | JavaScript | HTML | CSS | Full Stack

- Developed a full-stack healthcare platform connecting **organ donors, blood donors, hospitals, and recipients** through centralized database-driven workflows.
- Designed donor and recipient registration, record management, and request-processing workflows backed by **MySQL**.
- Implemented application logic for managing healthcare records, donor information, recipient requirements, and matching workflows.
- Developed responsive web interfaces using HTML, CSS, and JavaScript for backend-driven application functionality.
- Deployed the application online for public demonstration and evaluation.

Cricbuzz LiveStats – Real-Time Analytics Platform

Python | PostgreSQL | Streamlit | SQL | REST API

- Developed a real-time analytics application using **Python, PostgreSQL, Streamlit, SQL, JSON, and REST API integration**.
- Implemented API data-ingestion workflows for retrieving, transforming, validating, and displaying live cricket information.
- Designed relational database structures and SQL queries for storing and analyzing structured sports data.
- Built interactive Streamlit dashboards for live statistics, match information, analytics, and data visualization.

VisionSync – AI Attendance Management System

Python | Flask | OpenCV | SQLite | Authentication

- Developed an attendance-management platform integrating **facial recognition, QR authentication, GPS geofencing, device fingerprinting, and session validation**.
- Built Flask-based backend workflows and SQLite persistence for attendance records, user data, authentication events, and reports.
- Implemented multi-layer attendance verification combining identity validation, device information, location constraints, and session-level security checks.
- Developed faculty dashboards with attendance analytics and CSV/ZIP export functionality for reporting and data management.

Technical Skills

Programming Languages: Python, Java, JavaScript, TypeScript, SQL

Data Structures & Algorithms: Data Structures, Algorithms, Problem Solving, Searching, Sorting, Recursion, Complexity Analysis

Frontend Development: React.js, JavaScript, TypeScript, HTML5, CSS3, Responsive Web Design

Backend Development: Node.js, Express.js, Python, Flask, FastAPI, REST APIs, WebSockets, API Integration, Authentication

Databases: PostgreSQL, MySQL, SQLite, SQL, Relational Database Design, Database Management Systems, CRUD Operations, Data Modeling

Software Engineering: Object-Oriented Programming, Software Development Lifecycle, Modular Architecture, API Design, Debugging, Testing, Version Control, Agile Development

DevOps & Deployment: Docker, Docker Compose, GitHub Actions, Linux, Containerized Applications, Deployment Workflows

AI & Data: Machine Learning, Generative AI, Computer Vision, Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, OpenCV

Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, Streamlit, Power BI

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Cloud Computing

Education

Woxsen University

Bachelor of Technology (B.Tech.) in Data Science

2023 – 2027

Hyderabad, Telangana

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Software Engineering, Cloud Computing, Machine Learning, Deep Learning, Data Analytics, Artificial Intelligence

Certifications

- **Java Programming** – Duke University, Coursera
- **Object-Oriented Programming** – University of Alberta, Coursera
- **Data Structures in Python** – Coursera
- **Interfacing with the Arduino** – University of California, Irvine, Coursera
- **Introduction to Cyber Attacks** – NYU Tandon School of Engineering, Coursera

Achievements

- **Government of India Design Patent Holder** – Patent No. 470097-001 for an innovative IoT Connectivity Device.
- Built and deployed **20+ software projects** spanning Full Stack Development, Software Engineering, Artificial Intelligence, Machine Learning, Computer Vision, Healthcare, Networking, Analytics, and Developer Productivity.
- Developed publicly available applications and open-source projects demonstrating practical software engineering, backend development, database systems, API integration, intelligent automation, and deployment.
